\*\* Total number of dams a state regulates based on the NID and the NID inclusion criteria.

Column Explanations:  
 Total Number of Identified NID-Size Dams: All dams in state that meet definitions to be counted in the National Inventory of Dams, administered by the U.S. Army Corps of Engineers Topographic Engineering Center.

Number of NID-sized State-Regulated HH Potential Dams: All dams counted in the NID that are classified as high-hazard potential (loss of life likely in the event of a failure) and also fall under state regulation.

State-Determined Deficient Dams: Dams identified by state dam safety program as deficient: Total, high-hazard potential (HH), significant-hazard potential (SH).

State Dams Remediated: Dams under state regulation that have been remediated: Total, high-hazard potential (HH), significant-hazard potential (SH).
